Your source for Full Service Printing from Design through Final Product

What we do at Banner Printing

We specialize in corporate commercial printing, assisting companies in marketing their products and supplying them with quality printed materials. We specialize in short, medium and long runs, printing in 1, 2 and 4-color on almost any size or weight of paper. We can print from your files or help you create anything you can imagine on very tight deadlines!

Personal attention

Tired of indifferent employees from big city printing companies that hack your printing job out with no care or attention to detail? At Banner Printing Center we strive to provide the best in quality service.

Turnaround time

Trying to meet a deadline? With our state-of-the-art equipment and experienced staff, we can help you finish those last minute projects while still providing the quality and professionalism that your project requires.

Fresh ideas

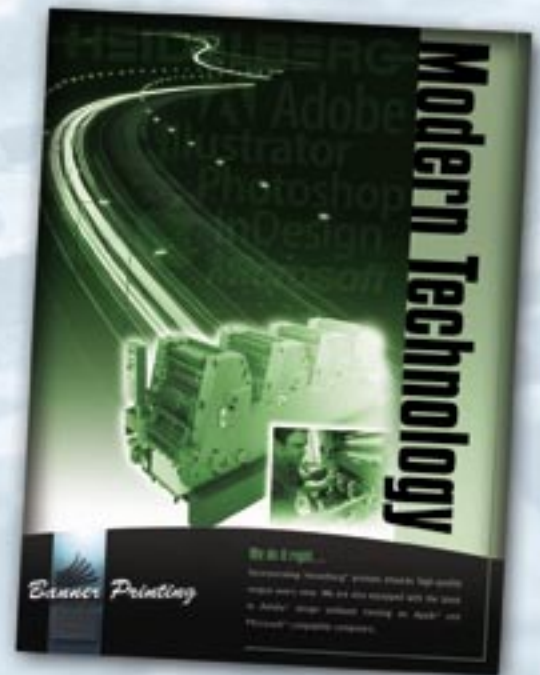

Need some creativity to enliven your advertising? Talk to our designers to see how we can give your business the edge over the competition with affordable design and quality service. Our designers are trained in professional design programs that can take your business to the next level.

We do it right

Banner Printing Center incorporates Heidelberg® presses, ensuring high-quality output every time. We are also equipped with the latest in Adobe® design software running on Apple® and Microsoft® compatible computers. With cutting-edge technology, we can make sure that what you see on screen ends up in beautiful color prints fresh off the press.

Banner Printing

Electronic Prepress Procedures

This procedures sheet has been created to help you prepare files for submission to Banner Printing Center and to ensure that files meet the requirements and guidelines of Banner Printing Center.

Please take a moment to read this sheet before sending your files. Please check all electronic files thoroughly and ensure they meet the specifications listed below.

Electronic material is the preferred format

Files provided to Banner Printing Center must conform to the specifications set below and include a digital printout for proofing purposes. We accept files created in:

- **QuarkXPress** as a document provided you supply all images (scans, .tiff, .eps, logos, printer and screen fonts, etc.).
- **Adobe Illustrator** saved as an .eps with all type "converted to outlines," all colors to CMYK (no spot colors – see note below).
- Adobe Photoshop format saved as a .tiff or .eps in high resolution, 300 dpi (PSD files will be accepted. If fonts are not included we cannot be responsible for text defaulting or reflowing).
- Adobe Acrobat PDF file saved in high resolution mode (Press Optimized). Other PDF files will be accepted from programs able to generate high resolution PDFs (however, Banner Printing Center is not responsible for fonts not embedded by these programs, as reflow and font default can occur).
- Adobe InDesign as a document provided you supply all images (scans, .tiffs, .eps, logos, printer and screen fonts, etc.).
- CorelDraw as a document provided you supply all images (scans, .tiffs, .eps, logos, printer and screen fonts, etc.) needed to print project. We prefer PDF files from this program, but we will accept the documents with all of the items mentioned above.

Files provided via E-mail or FTP site.

Email your files to orders@bannerprintingcenter.com. Or for larger files, you can upload them via our FTP server at www.bannerprintingcenter.com.

We DO NOT accept...

Digital files provided with image resolution less than 300 dpi or images downloaded from the internet. *These files are considered Low Resolution and Banner Printing Center will not be responsible for the poor quality as a result of printing.*

If you cannot produce electronic material in the programs listed above, please call us at 520-458-5550 to consult with one of our designers to have them design the project for you.

NOTE: We may be required from time to time, to adjust and manipulate your files to ensure they meet our specifications. You will be contacted if adjustments need to be made and you will be given an opportunity to resupply us with a new file, or for Crown Press to make the necessary adjustments upon your request.

Useful Printing Terminology

- **EPS** – Encapsulated Postscript File. A vector-based computer graphics file format developed by Adobe Systems. EPS is the referred format for many computer illustrations because of its efficient use of memory and fine color control.
- **TIFF** – Tagged Image File Format, a file format used for the reproduction of digitally scanned images such as photographs, illustrations & logos.
- **PDF** – Portable Document Format.
- **Registration** – The process of alignment of the different elements in a printing job, such as the different colored inks on a print job, so they are correctly printed next to each other or over each other.
- **Bleed** – an image or printed color that runs off the trimmed edge of a page.
- **Trapping** – Printink ink over previously printed ink. Trapping is also used to describe the very slight overlapping of adjacent colors.
- **CMYK** – The four process color inks: Cyan, Magenta, Yellow and Black.
- **RGB** – Red, Green, and Blue; the colors used by a computer monitor to create color images on the screen. These are not printed inks.
- **PMS color** – (Pantone Matching System) A proprietary color system for choosing and matching specific spot colors.
- **DPI** – Dots Per Inch refers to the resolution of an image or device (300 dpi is required for printing).
